

ORAL HEALTH STATE PLAN REVIEW INDEX

Centers for Disease Control and Prevention
National Center for Chronic Disease Prevention and Health Promotion
Division of Oral Health
April, 2003

Items for inclusion in this index were taken from National documents (the Surgeon General's Oral Health Report (2000), National Call to Action (2003), Healthy People 2010, Core Public Health Functions, and CDC PA 03022 Performance Measures) indicating National objectives or "what should be done". Additional items were gathered from proven prevention practice guidelines, literature review regarding what makes an effective plan, as well as from promising practice submissions – published state plans -- to reflect "what could be done". It is up to each state to review these documents in light of what data reveals about the context to reflect "what can be done." Use of this tool is intended to assist sites in a review of the above mentioned documents. Use of evaluation throughout the process of plan development, dissemination, and implementation will assist each site in understanding "what was done" as well as shed light on what should be done next. Additional information can be found at http://www.cdc.gov/OralHealth/state_programs/infrastructure/activity3.htm.
