ASTDD Resources

Improving Oral Health Access and Services for Older Adults White Paper
(https://www.astdd.org/docs/improving-oral-health-access-and-services-for-older-adults.pdf) – ASTDD explains the rationale for supporting efforts to provide a comprehensive dental benefit for older adults in publicly funded programs such as Medicare and Medicaid, and inclusion of dental benefits in all health insurance plans. ASTDD also encourages state level data collection and supports research efforts to further document cost-savings and overall economic benefit from optimum oral health among older adults. (February 2018)

ASTDD Older Adult Oral Health Best Practice Approach Report
(http://www.astdd.org/bestpractices/bpar-oral-health-in-the-older-adult-population-age-65-and-older.pdf) (March 2017) This report contains a wealth of information pertaining to older adult oral health as well as links to many resources.

Talking Points-Why Oral Health in Older Adults is Important (http://www.astdd.org/docs/why-oral-health-in-older-adults-is-important-talking-points-12-2015.pdf) – This infographic, collaboratively developed by the ASTDD Healthy Aging Committee and the American Dental Association, provides talking points that highlight the importance of oral health in older adults. (Dec 2015)

Older Adult Basic Screening Survey (BSS) Resources

ASTDD Basic Screening Survey for Older Adults Planning and Implementation Tool Kit
(http://www.astdd.org/basic-screening-survey-tool/#adults) This downloadable toolkit contains all of the information you will need to plan and conduct a BSS of vulnerable older adults.

Older Adult BSS Tips for Success - A collection of lessons learned from states that have conducted an Older Adult Basic Screening Survey and information on ASTDD resources, including BSS coaches, to assist states and organizations planning to collect oral health data on this age group. (January 2017)

States with BSS Oral Health Data - Listing of states that have completed a Basic Screening Survey of the older adult population and links to reports from some of those states. Great resource for states looking to do a BSS of this population or for those looking for data related to older adults.

Older Adult Webcasts

ASTDD Chronic Disease and Older Adult Oral Health Webcast
(https://astdd.adobeconnect.com/_a933923135/pqkumkkq99o5/?proto=true) - As the older adult population in the U.S. increases, there is a greater need for those in public health and clinical oral healthcare settings to incorporate chronic disease assessment for older adult patients. Our speakers discussed how various chronic disease conditions can impact treatment planning and oral health outcomes. Ms. Park is a chronic disease consultant to the ASTDD and the National Association of Chronic Disease Directors. She provided an overview of the connection between a healthy mouth and overall health. Dr. Cartier provided information on
national trends and how they impact the delivery of oral healthcare. He also discussed the Seattle Care Pathway and how this can be applied to "prioritize" the type of oral care that is delivered to older adults. (August 2018).

**Data Sources: Where to Uncover Oral Health Information for Older Adults**  
(https://tinyurl.com/rzdgqea) Get an overview on how to find older adult oral health data (BRFSS, NHANES, MEPS, CASOA, BSS, etc.) and where to find valuable information that can then be shared to raise the awareness of older adult oral health issues. Once you’ve discovered this treasure trove of information, how do you cash in on it? Check out an infographic template that was shared as part of the webcast. The template can be used to frame your newly found wealth of information. (March 2017)

**Medicaid Dental Coverage: The Consumer Perspective and Potential Economic Impact**  
(https://tinyurl.com/wywhp3g) ADA’s Health Policy Institute conducted a study based on a series of focus groups. Each group had ten participants comprised of men and women ages 50 and older representing different races/ethnicities, education and income levels, and political perspectives. Principal findings: 93% of the surveyed consumers ages 50 and older support adding dental coverage to Medicare. Presenter: Cassandra Yarbrough, MPP, Lead Public Policy Analyst, Health Policy Institute (January 2019)

**Medicaid Oral Health Coverage for Older Adults and People with Disabilities**  
(https://tinyurl.com/vjrhgks) This presentation, brought to you by the ASTDD Healthy Aging Committee in collaboration with the National Association of States United for Aging and Disabilities (NASUAD), discussed the results of a survey the NASUAD administered to its network of state agencies and a review of state coverage policies. The study was developed to review current programs providing oral health services; understand access and utilization; recognize existing collaborations for outreach to beneficiaries; and identify challenges with oral health policy across state agencies. The survey analysis identified several key themes from state data, including: a need for additional collaborative actions to improve oral health; identifications of targeted innovations regarding coverage for older adults and people with disabilities; greater understanding of the incurred medical expense benefit could assist with coverage and access; and outreach to participants and increased coverage could improve utilization. Damon Terzaghi, MSA, Senior Director at the National Association of States United for Aging and Disabilities reviewed the survey findings and discussed the implications for state dental directors and policymakers. (January 2017)
