

I-Smile Dental Home Initiative

about 2 weeks ago

The I-Smile@School program is looking forward to visiting classrooms across Iowa this year to provide oral health education and preventive care – whether virtually or in-person. Having a healthy mouth is important for learning and concentration!

Even though things will be very different this school year, the I-Smile program will be here to share in your child's success, smiles and oral health education. Happy first days of school!
